LED SOLUTIONS
FOR GAMING MACHINE MANUFACTURERS

LCE LED & COMPONENTS EXPERT

Your lighting partner

LED solutions for industrial integration.

We support manufacturers in the gaming and amusement industry from design to series production, providing lighting design, technology and technical support for fast, reliable integration, ready for intensive use.

Partnerships that drive the game

We are the strategic partner to centralize your solution: consolidate suppliers, reduce issues and improve production control.
Together, we can develop machines with greater visual impact, a better user experience and lighting designed for intensive use.

PRODUCTS
LED strips for the gaming sector

RGB LED strip

Versatile, uniform lighting for signage and backlighting.

- High-performance LCE LED strip.
- Available in IP20 – IP68.
- Color stability and optimized power consumption.

Reliable backlighting and signage for gaming machines and casino environments.

Digital LED strip

Dynamic effects and animations that make the difference.

- Individual control of each LED for animations and dynamic effects.
- ONSEMI chip (WS family) selected according to application and machine format.
- High reliability for intensive use.

Programmable animations and effects to maximize visual impact and the gaming experience.

COB LED strip

Continuous light and a premium finish with no visible dots.

- High LED density for total uniformity.
- Continuous light with no pixelation effect.
- Direct integration into housing or acrylic.

Premium finish for visible areas where aesthetics make the difference.

SOLUTIONS
What do we offer?

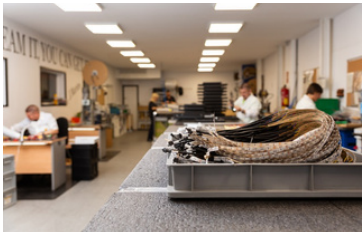

Centralize your LED solution.

Fewer suppliers, fewer issues and greater control in production.

Lighting design from the concept stage of the machine.

Experts in LED solutions for industrial integration. We consider the lighting from the very beginning of the project.

Custom LED harnesses

Manufactured according to the project drawings and actual requirements.

LED strip assembly on a mounting support

In housing, acrylic or other supports, to simplify integration into the production line.

Final assembly of TFT displays

We simplify integration and reduce the number of contacts in your supply chain.
